Pre Cast Yard reaches major milestone with the completion of 1000 segments

Over the month of July, crews out at the Pre Cast Yard in Robstown reached a major milestone when they hit the thousandth mark related to the construction and completion of concrete segments. To date, nine molds are in full production, 1,000 concrete segments have been completed and 168 of those segments have already been transported to the north approach section of the Project for construction. The segments weigh approximately 100 tons each and reach a height of up to 14 feet and a width of 70 feet. Approximately 2600 segments will be needed to complete the construction of the cable stay bridge and supporting approach bridges.

August Sidewalk Talk to showcase progress on south side cable stay bridge pylon

The public is invited to attend the next HBP Sidewalk Talk scheduled for Saturday, August 31 at 10 a.m. to be held at the Whataburger Field parking lot adjacent to Hooks stadium. Attendees will get the chance to learn more about the specific methods being utilized in the construction of the Cable Stay Bridge towers, which include the lower and upper pylons. Mark your calendar as it is sure to be a fun event for the entire family!
