November 2016

US 181 Harbor Bridge Project holds public meeting

Several community members attended an open house style public meeting November 17 to discuss proposed design modifications to the Harbor Bridge Project, specifically addressing the area south of the Corpus Christi Ship Channel. Attendees reviewed exhibits detailing proposed design modifications and had the opportunity to ask questions and submit comments regarding the proposed modifications. Additionally, the project team released a 4D animation of the project, which includes “real-life” views of the proposed roadway and bridge design. A 3D model of the new US 181 Harbor Bridge, complete with its own glass case, was also on display for attendees to view. [Click here](#) to view the animation.
