Crews achieve Project milestone with completion of drilled shafts

Final drilled shafts will make up foundation of bridge pylons

Harbor Bridge Project (HBP) crews have reached another milestone with the completion of 40 drilled shafts on both the north and south side of the project. The 40 drilled shafts will make up the foundations of the two bridge pylons. There are 20 drilled shafts located on the north side of the project and 20 located on the south side of the project. Each of the shafts are 10 feet in diameter and were drilled to a depth of just over 200 feet. More than 500 cubic yards (approximately 70 truckloads) of concrete was placed in each of the completed drilled shafts. Crews are now moving into the next stage of construction which includes trenching areas around the shafts to prepare for the completion of the footings. Check out the HBP Facebook page for updates on construction in all project areas.

UPCOMING EVENTS:

Community Connections

May 31:
Community Advisory Board Mtg.
Oveal Williams Senior Center
5:30 p.m.

June 14:
North Beach Traffic Phasing
Texas State Aquarium
6 p.m.

HBP crews prepare drilled shafts for the completion of the footings.

A large auger is used to drill each shaft to a depth of approximately 200 feet in depth.

HBP celebrates successful Safety Week campaign

Harbor Bridge Project (HBP) crews and personnel spent the week of May 7-11 celebrating a shared commitment to safety on the jobsite and beyond, as part of an industry-wide education and awareness event. Safety Week 2018 included a variety of scheduled events such as safety awareness training activities and demonstrations, as well as, incentives designed to educate, inspire and promote best safety practices. Prizes were awarded for a "Safety First" kids coloring contest and crews were thanked for their continued commitment to ensuring that safety remains top priority on the project. HBP employees continue to exemplify the 'Be the Bridge to Safety' project motto!

HBP Pre Cast Yard crew members form the word "SAFETY" for an aerial photograph in celebration of Safety Week.

HBP Project Managers serve lunch to show their appreciation to crews for their continued commitment to safety.
