#### Community Connections

July 12:  
HBP Presentation  
Rotary Club Southside CC  
11:30 a.m.

July 20:  
HBP Presentation  
Robstown Area Development  
Commission  
6 p.m.

### Project milestone achieved; concrete poured on first test pylon

A major project milestone was achieved on June 2, as crews worked overnight and through the early morning hours to prepare the site for the first placement of concrete on the project. Crews poured concrete for the first test pylon on the north side of the Harbor Bridge. More than 400 cubic yards of concrete were placed into the test pylon shaft that measures 210 feet deep and 8 feet wide. Results from the test pylon will assist with refining the final design specifications and ensuring quality control measures are addressed. Plans to perform the exact same construction activity on the south side of the bridge for the south test pylon are scheduled for late July. Visit our Facebook page for additional pictures and video of the entire process!

FDLLC crews prepare for the first placement of concrete on the North Pylon.

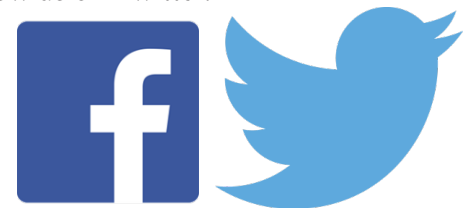

Concrete trucks on site to pour the first placement of concrete on the North Pylon.

FDLLC team was invited to the Citigo Refinery Lunch & Learn to share information about the Harbor Bridge Project.

### Stay informed with the latest Harbor Bridge Project traffic updates
