May Harbor Bridge Project Sidewalk Talk held at Whataburger Field parking lot

Despite the rainy weather, the HBP Sidewalk Talk held at the Whataburger Field parking lot had plenty of interested guests. It was the first time a Sidewalk Talk was held in the Corpus Christi area, as previous events have been hosted at the Pre Cast Yard located in Robstown, Texas. The new location adjacent to the Cable Stay Bridge (CSB) south tower construction area did not disappoint. Attendees were provided the opportunity to learn more about the specific methods used for the construction of the CSB towers on both the south and north ends of the project. Check out the HBP website at www.harborbridgeproject.com or like us on Facebook and follow us on Twitter to find out when the next event is scheduled.

HBP celebrates successful 2019 Safety Week

Harbor Bridge Project crews and personnel spent the week of May 6-10 celebrating a shared commitment to safety on the job-site and beyond, as part of an industry-wide education and awareness event. Safety Week 2019 included a variety of scheduled events such as safety awareness training activities and demonstrations, as well as, incentives designed to educate, inspire and promote best safety practices. The theme for the week-long campaign was "Safety by Choice". Prizes were awarded for a number of Safety Week challenges including a kids coloring contest and opportunities for HBP employees to share their personal stories on why they strive to work safely.

Lane reductions on Leopard Street to continue until the end of 2019

Lane reductions on Leopard Street near the IH 37 and SH 286 interchange will continue until December of this year. The impacts include reducing traffic to one lane in each direction between Lester Street and Mexico Street. The lane reductions are necessary to construct bridge footings in the area. Motorists are asked to use caution while driving in this work zone. FMI on local traffic impacts visit www.harborbridgeproject.com.
